

Bioinformatics Summer Internship The Boyce Thompson Institute at Cornell University

SOL Genomics Network

Be part of an exciting research project in the summer of 2011. The project is a large international effort to sequence the tomato genome. You can learn more about the project by visiting the SOL Genomics Network (SGN; <http://solgenomics.net>) and clicking on the link for the International Tomato Project.

Students will work under the direction of a small team of bioinformaticians. We are seeking highly motivated individuals with strong interests in computers and/or biology to work on computational projects such as web-programming of new tools for plant scientists and designing and implementing relational databases for genomics applications. Knowledge of programming is desired.

Compensation is provided through a stipend. In addition, a predetermined amount of funds is available towards travel expenses and to cover housing for students outside the Ithaca, NY area.

Graduate students are not eligible for this internship.

Applications are available at <http://solgenomics.net/outreach>. The application deadline is March 7, 2011.

For additional information, contact Dr. Joyce Van Eck (jv27@cornell.edu).
